

Section 20 Computers and Information Technology

20.01 Text Messaging, Video-Taping, and Photography Using Cell Phones

It is the policy of the Jackson County Health Department (JCHD) to maximize the effective and efficient use of information technology to support the provision of public health services, while assuring protection of personally identifiable and protected health information. [Attachment CC](#) defines the circumstances and procedures under which the functions and features of department issued cell phones can be used to support service provision. To the extent that they relate to or control, this policy incorporates by reference the requirements of county policies No. 6010, 6030, 6040, 6070, and Administrative Directive 2013-1.
