

Did you know?

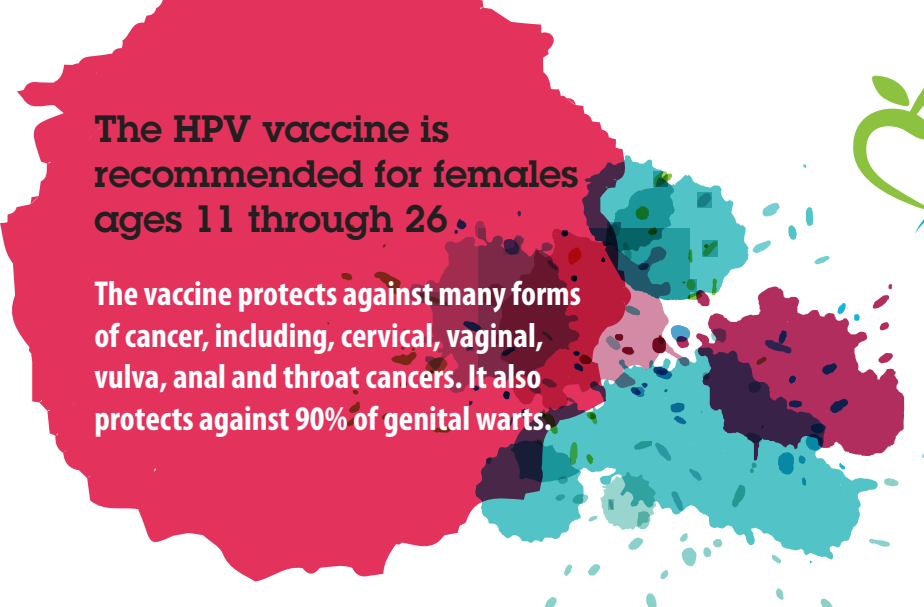

The HPV vaccine will help protect you from the effects of HPV!
(human papillomavirus)

4 out of 5 people
will be infected
with HPV at some
point in their life.

79 million
Americans are
currently infected
with HPV.

HPV causes almost
all cases of
cervical cancer.

The HPV vaccine is recommended for females ages 11 through 26.

The vaccine protects against many forms of cancer, including, cervical, vaginal, vulva, anal and throat cancers. It also protects against 90% of genital warts.

SHIAWASSEE COUNTY
HEALTH DEPARTMENT
Promoting Wellness. Protecting Health.
